dtjv.io github.com/dtjv

Software engineer, experienced creating React-based web applications, writing articles about coding adventures and collaborating with clientele. Passionate about intuitive UI/UX, full-stack web technologies and helping people and organizations reach their goals.

### **EXPERIENCE**

### Software Engineer | Freelance

2021

Terra Gardens | docs | demo

- Developed a full-stack, scheduling app for a garden center's delivery service. Provides an intuitive stepped-form for
  accurate data entry, calculates and lists available delivery times and includes a drag-n-drop feature to maintain schedule
  integrity.
- Built with TypeScript, React, Next.js, Chakra-UI, React-DnD, React Query, React Hook Form, and MongoDB.

## Frontend Engineer | Freelance

2020

Richard Gullion | docs | website

- Created a website to showcase Rich's artwork.
- Built with Gatsby, React, GraphQL, and Tailwind CSS.

### Frontend Engineer | Freelance

2017-2020

BMI Fitness, LLC | docs | website

- Developed a fitness studio website to present services, staff bios, and published content and to capture customer leads.
- Built with Jekyll, Materialize and Sass. Integrated Formspree.io for form routing and Forestry.io for content management.

### Software Engineer | Freelance

2015-2017

Club One Fitness. Inc.

- Created a Node.js CLI tool to bundle client workout files (written in Markdown) into one printable web page. (docs)
- Built a jQuery and Firebase web app for trainers to collect and manage client movement screening data. (docs | demo)

# Software Engineer | Freelance

2015

St. Christopher - Art Enrichment Program | docs

- Created a Google Sheet menu function to detect and report schedule conflicts among proposed art classes.
- Built with JavaScript, Webpack and Google App Script API.

## **PROJECTS**

#### Memowise | docs | demo

- Created a full-stack, responsive education web app offering algorithm-based study, dynamic quizzes, and a personalized dashboard.
- Built with React, Next.js, MongoDB, Tailwind CSS.

### Maximus | docs | demo

- Created a web app to create workouts and visualize them in an interactive bar chart.
- Built with React, React-Bootstrap and Chart.js.

### Travel Salem | docs | demo

- Designed a travel site demo, with a focus on intuitive site navigation, surfacing buried content and optimizing load speed.
- Built using Next.js and Tailwind CSS.

### **EDUCATION**

#### Cal Poly, San Luis Obispo
